BULLETIN

THE PROBLEM: WORN OR FAILING STRUT ROD BUSHING

- Standard rubber material used in OE bushings are prone to deterioration due to weather, road hazard or contamination.
- Symptoms include road wander and rattling or clunking while driving or braking on rough roads.
- OE bushings may be available as part of an expensive assembly only.

THE PROBLEM SOLVER: CARQUEST® STRUT ROD BUSHING KIT

- CARQUEST's thermoplastic rubber bushings provide real endurance by combining the benefits of two key materials: strength from plastic and compression from rubber, allowing the bushings to absorb shocks from street or off-road use.
- These heavy-duty bushings are not affected by oils, alkalis, ozone or hydrocarbons, and can withstand extreme weather conditions and absorb substantial load. They will not crack or discolor with age.
- One kit covers both sides of vehicle and includes 4 bushings and 2 collars.

YEAR	MAKE/MODEL*	REPLACEMENT PART NO. BUSHING KIT
'80-'97	Nissan 720/D21 2WD	K9515
'80-'95	Nissan 720/D21 4WD	K9515
'80-'97	Nissan Hardbody Pickup 2WD	K9515
'80-'95	Nissan Hardbody Pickup 4WD	K9515
'86-'95	Nissan Pathfinder 2WD & 4WD	K9515
'98-'99	Nissan Frontier	K9515
