CARQUEST Premium Disc Brake Pads Provide Exceptional Performance, Safety and Value.

Our most complete product offering supplies industry-leading premium brake pad coverage, performance and reliability. Quality engineered for the wear and tear of everyday driving, CARQUEST Premium Disc Brake Pads feature vehicle-specific Ceramic, Semi-Metallic and NAO formulations for consistently safe, quiet and fade-resistant stopping.

Major Product Advantages:

- *OE Design Shims, Slots and Chamfers*
- *Longer Lasting Pad Life and Smooth, Quiet Braking*
- *Premium Vehicle-Specific Friction Formulations*
- *Includes Hardware and Wear Sensors (where applicable)*
- *Low Dusting and Fade Resistant*
- *Exceptional Performance and Safety*
- *Highly Competitive Price*

Premium Disc Brake Pads

Did You Know?

Not all brake manufacturers offer OE designed slots and chamfers. Why is this important? CARQUEST understands that slots channel heat and dust away from the brake pad, reducing noise and brake fade. Slots also contribute to the stability of the friction material as it expands and contracts due to the high temperatures related to braking.

Chamfers are angled, beveled or radial integrated edges on the ends of brake pads. They help reduce the pad's tendency to vibrate as the leading edge contacts the rotor when the brakes are applied. This feature produces noise inhibiting benefits for the customer.

CARQUEST Total-System Solutions

CARQUEST carries a complete line of quality brake system repair components and tools needed to ensure customer satisfaction. Whether your needs include...

- brake pads and shoes
- calipers
- drums and rotors
- wheel cylinders
- master cylinders
- ABS components
- hoses and brake fluid
- hardware and cables

...CARQUEST has a total-system solution for every vehicle.

No matter what brake pads originally came on the vehicle, CARQUEST has the right replacement.

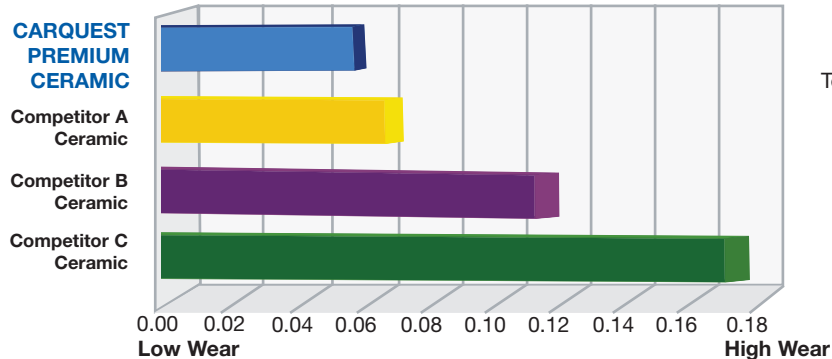

Manufactured with OE Quality Technology and Features

CARQUEST utilizes the most advanced technology in brake pad design and construction. From premium attached OE quality shims for noise dampening to vehicle-specific slots and chamfers for smooth braking, CARQUEST Premium Disc Brake Pads are the choice of professional technicians.

Excellent Performance

CARQUEST Premium Disc Brake Pads consistently outperform competitive products in wear and noise performance. Testing demonstrates that CARQUEST Premium Ceramic Disc Brake Pads excel in providing the customer with more trouble-free braking.

Ceramic Wear Performance vs. Competition

Test performed on D601 ceramic platform at 250° F braking temperatures. 900 stops performed. Affinia Research and Development Center – 2007

CARQUEST Technical Institute

CARQUEST Technical Institute provides world class brake system training for professional technicians with up-to-date technology and real world solutions.
