

PRODUCT & ENGINEERING BULLETIN

85748 Cummins Oil Filter Product Improvement

- ① Lathe Cut Gasket
- ② Self Centering Flow Separator
- ③ Pleated Synthetic Bypass Media

Lathe cut gasket to improve the seal between filter and filter base. There is no longer a pinch seal between filter seam and gasket

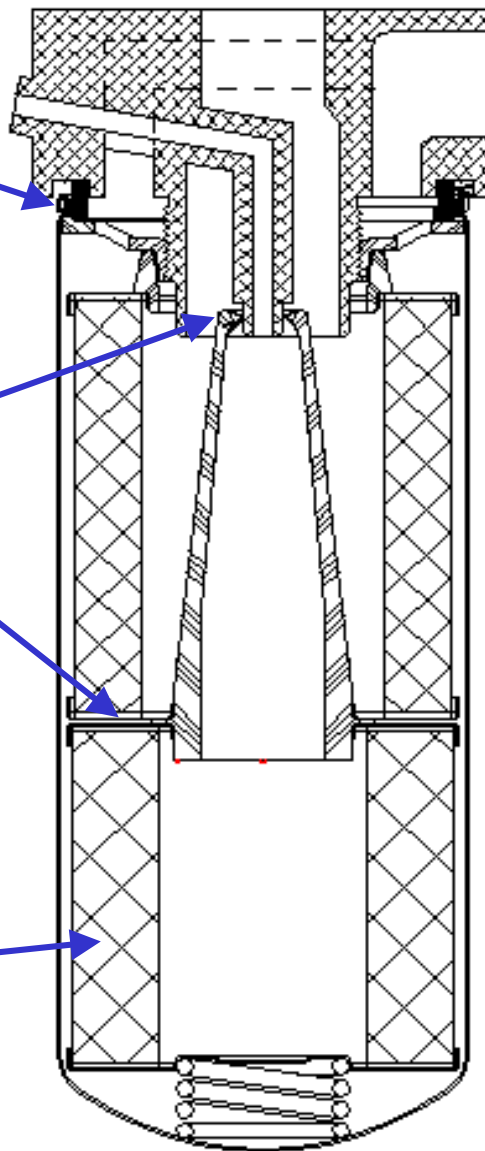

1

New flexible Self Centering flow separator which provides a positive seal between the full flow and bypass elements to insure proper filtration

2

Pleated synthetic media (developed in our racing program) used in our bypass element to remove engine sludge.

3

85748 also available in Master Pack - 85748MP
