## 85748 Lube Filter for Cummins\* Engines Cummins Sludge Test Performance Results Tested According to Cummins Engineering Standard

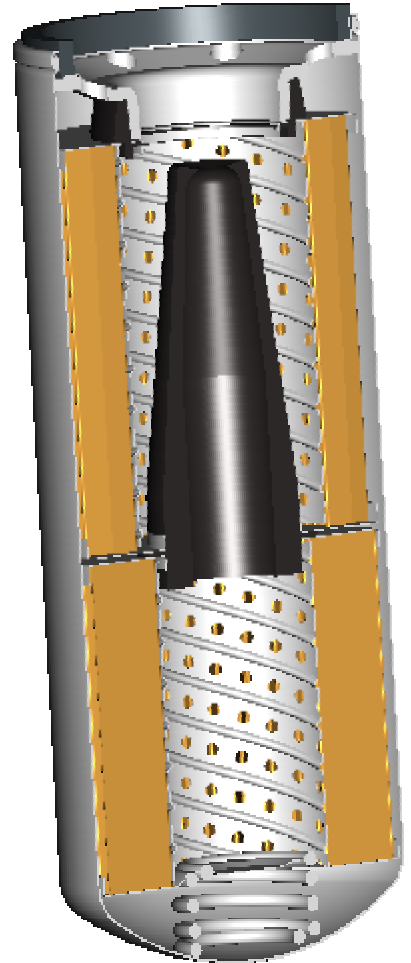

Initial Restriction is the amount of pressure it takes to flow oil through a new filter. The lower the Initial Restriction the Better. This is especially beneficial on cold starts. The **CARQUEST Filter 85748** performed as good as or better than the OE Filter

Highest Contamination Level is a required measurement in the Cummins Sludge Test measuring the sludge contamination level of the oil at certain periods during the life of the filter. The **CARQUEST Filter 85748** had **19.1% less contaminates** in the oil than the OE Brand in this measurement.

Filter Life is the length of time the filter performs until termination. Termination is determined when the pressure differential reaches 25 PSID. The **CARQUEST Filter 85748** performs **22.2% longer** than the OE Brand.
